DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-28, 36-47 and 53-55, drawn to an apparatus and method for increasing the effective capacity in a wireless communication system by translating RF signals from one wireless frequency band to another wireless frequency band, classified in class 455, subclass 20.
 - II. Claims 29-35 and 48-52, drawn to an antenna of communicating in a wireless communication system for selectively switching between the different beams of antenna elements depending on the strength of a signal associated with the beams, classified in class 455, subclass 121.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination is not essential to the combination. The subcombination has separate utility such as the patentability of translating RF signals from one wireless frequency band to another wireless frequency band in a wireless communication system for

increasing the effectively capacity does not rely on the detailed structure of an antenna system for communication in the wireless communication system.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Eng whose telephone number is 703-308-9555. The examiner can normally be reached on Tue-Fri 7:30 AM-6:00 PM.
